

Teach Money Management with a Debit Card

If you've already been teaching smart money management skills and your son or daughter has shown financial responsibility, a debit card/checking account from Mid Oregon Credit Union can be a great next step now that your child is a teen.

With today's mobile banking tools, your teen (and you!) can be up to speed on account balances, transactions and mobile alerts. The newest Mid Oregon tool, CardNavSM by CO-OP, gives real-time security and control over Mid Oregon debit cards through smartphones or tablets! It can use GPS to restrict transactions to businesses within a designated area. You can limit debit card use to specific merchant or purchase types. You can receive near real-time, in-app transaction alerts, and receive alerts when you're getting close to any personal spending limits set. (Read full article at www.midoregon.com/blog/category/financial-education)

Contact us today about opening a student account! Go to student.midoregon.com, or scan the code for easy CardNav download and install on your mobile device.

Get in the Driver's Seat with an Auto Loan from Mid Oregon

Lower rates, convenient terms, fast, friendly and local service, are just a few reasons why you will be in the driver's seat quicker.

Time to replace the old clunker? Sending your student off to college? Just want new wheels? Finding the right car or truck at the right price can be challenging. At Mid Oregon, we believe that finding the right auto loan shouldn't be. Our financial service representatives have your best interests in mind and are here to make sure you're getting the best rate and terms for your financial situation.

Visit us on the web at midoregon.com, come in and talk with a representative, or call 541 382-1795.

Coming Soon!

Checking

At Mid Oregon we offer simple solutions to money management. We offer a safe place to hold your money so you can write checks or use your debit card to pay bills, make purchases, and manage your finances. Mid Oregon also offers secure online and mobile access to your credit union checking account, allowing you to keep track of your money at any time of the day. Features include:

- › Debit card with CardNavSM
- › Online and mobile access
- › Remote deposit
- › eBillpay, eStatements
- › Account alerts
- › Over 30,000 CO-OP ATMs nation wide, and over 80,000 worldwide!

Come in and visit us, we'll help you switch, or call 541 382-1795.

Savings

No matter your financial situation or how much you earn, you can save. Even the smallest amounts tucked away regularly will accumulate into a nice savings cushion.

Use Mid Oregon's automatic transfers to get in the habit of saving. Money will be transferred from your account without you seeing it, which makes you less likely to miss it. Simply complete a form authorizing Mid Oregon to deposit a portion of your paycheck directly into your savings account.

Start small. Think big. Make the dream of saving a reality.

Visa Chip Cards

Visa chip card technology is a part of Mid Oregon's continuing commitment to our members' financial safety and security.

What does this mean?

If you use Visa cards, you might begin to see something different about them in the months ahead. The difference is in a small, square area on the card called an EMV (Europay Mastercard & Visa) that contains an embedded computer chip. This chip provides an extra layer of security and flexibility without compromising convenience or familiarity. Not only are they easy to use, they can be used to pay on any terminal that accepts Visa. So no matter how you pay, your card won't get in the way.

Chip cards are easy to use.

Visa chip cards and chip-activated terminals work together to protect in-store payments. Rather than swiping your card, you insert it, chip-side up into the terminal and follow the on-screen prompts. Every time your card is used at a chip-enabled terminal, the embedded chip adds a unique one-time code behind-the-scenes, to the traditional account information. This is needed for the transaction to be approved; a feature that cannot be replicated by counterfeit cards, providing you with extra fraud protection.
